Phone: +6281296451496

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building high-performance, scalable web and mobile applications in production environments. Proficient across the full stack, utilizing Go, Laravel, Express.js, and Next.js/React. Proven track record in optimizing database performance (PostgreSQL, MySQL, SQL Server, Redis) and implementing robust event-driven architectures using Kafka. Experienced in streamlining DevOps pipelines and server management via Docker, Ubuntu, Nginx, and HestiaCP to drive architectural efficiency and project success.

KEY ACHIEVEMENTS

- **Project Leadership:** Successfully led multiple end-to-end application projects, from requirements gathering to release, delivering high-quality and reliable solutions.
- **Team Mentorship:** Guided and mentored junior developers by promoting best practices and effective tool usage, contributing to team efficiency and professional growth.

WORK EXPERIENCES

AHLI BANGUN SISTEM - Indonesia's Tech Company

Software Engineer | January 2023 - May 2026

- Engineered a secure Wallet System for marketers, automating earnings distribution, peer-to-peer transfers, and withdrawals while implementing Google 2FA to ensure enterprise-grade security.
- Developed a multi-vendor E-commerce Shop System, delivering an end-to-end marketplace for users and vendors, complete with an administrative dashboard for transaction auditing and automated fraud detection.
- Designed and implemented a scalable Referral Tree System to accurately track multi-tier user referrals, automate reward distribution, and generate data-driven insights for marketing strategies.
- Optimized complex SQL queries, drastically reducing database response times from 1 minute to 1 millisecond, significantly enhancing system reliability and overall user experience.
- Integrated OpenAI API to engineer an interactive AI analytics assistant, delivering real-time business summaries, profit insights, and client metrics via instant natural language querying.
- Implemented Facial Recognition biometrics to enforce secure user verification during authentication and critical profile updates, mitigating identity fraud.

- Architected a dynamic CRM System featuring granular Role-Based Access Control (RBAC), analytical dashboards, and modular components supported by a robust REST API for future scalability.
- Built a comprehensive HRM Platform that streamlined core operational workflows including automated payroll, recruitment pipelines, attendance tracking, project management, and performance evaluations.
- Developed a high-availability WhatsApp Gateway REST API, simplifying and standardizing the integration of automated messaging functionalities across multiple internal systems.
- Deployed and managed production server infrastructures on Ubuntu utilizing HestiaCP, configuring Nginx reverse proxies, automated SSL provisioning, database tuning, and Cloudflare for enhanced DDoS protection and CDN caching.
- Integrated MetaTrader API across CRM backend and mobile applications, establishing robust real-time data synchronization to enable seamless user interaction and live trading data streaming.

ADIRA FINANCE - Finance Company

Software Engineer | April 2026 - Present

- Developed and enhanced the Taxasor portal, ensuring seamless integration and high-performance communication across a microservices architecture.
- Developed a centralized Admin Portal integrated across multiple microservices to enable real-time system monitoring and comprehensive health checks.
- Developed a high-performance Reporting Application for the business team, streamlining operational monitoring and accelerating data-driven decision-making.
- Developed a cross-platform mobile application (iOS & Android) seamlessly integrated with the core microservices architecture to provide users with centralized, intuitive access to essential features.
- Integrated DOKU Payment Gateway to facilitate secure, automated, and seamless payment processing within the application.
- Investigated and resolved production bugs, including data and transaction discrepancies, while assisting the business team with technical escalations.

Thovalea - Entertainment & Gaming Tech

Software Engineer | May 2026 - Present

- Architected and designed a distributed microservices ecosystem, defining service boundaries, communication protocols, and scalability strategies tailored for high-performance application needs.
- Integrated core applications with live streaming software (e.g., OBS, Streamlabs) to deliver dynamic, real-time viewer alerts and interactive widgets triggered instantly by payment gateway donation events.
- Engineered an event-driven integration architecture using Apache Kafka and Redis Pub/Sub, linking payment gateways to streaming platforms (OBS/Streamlabs) to trigger low-latency, real-time overlay notifications instantly.
- Integrated VTube Studio API via WebSockets to trigger real-time live-model animations, expressions, and interactive tracking events automatically when viewers send donations or interactions.

EDUCATIONS

PELITA BANGSA UNIVERSITY

Bachelor of Computer Science | Aug 2021 - Aug 2025

- Specialized in web development, covering both frontend and backend processes.
- **Relevant coursework:** Operating Systems Architecture, Linux/Unix Programming, Web & Software Usability, Java Programming (Beginner & Intermediate), Web Development, Relational Database Design & SQL, Data Engineering, Advanced Software Programming.

SKILLS

- **Distributed Systems & Microservices:** Proficient in designing and scaling decoupled microservices architectures, leveraging event-driven systems (Apache Kafka) and high-performance message brokers (Redis) for high-concurrency environments.
- **Full-Stack Engineering:** Expert in the end-to-end software development lifecycle (SDLC) within Agile environments, delivering robust backend APIs (Go, Laravel, Express) and highly responsive, optimized web/mobile interfaces (Next.js, React Native).
- **Data Processing & Analysis:** Proven ability to design and implement systems for efficient data processing.
- **Database Architecture & Optimization:** Advanced knowledge in relational and non-relational database design, with a proven track record in query optimization, data indexing, and managing complex data layers under tight latency requirements.
- **Software Development Principles:** Familiar with key software development principles like SOLID and DRY, contributing to scalable and maintainable software.
- **Software Design & Best Practices:** Strongly committed to writing clean, maintainable, and scalable code by rigorously applying SOLID principles, DRY design patterns, and implementing robust security practices (e.g., Google 2FA, biometric authentication).
- **Infrastructure & DevOps:** Experienced in provisioning, securing, and managing cloud/on-premise servers (Ubuntu) utilizing Nginx, HestiaCP, automated SSL deployment, and Cloudflare integration for optimized traffic routing and DDoS protection.
- **Technical Leadership & Agile Delivery:** Proven ability to define technical visions, lead cross-functional projects, mentor team members on best practices, and drive efficient delivery timelines within Agile/Scrum frameworks using modern tracking tools (e.g., ClickUp, Jira)..
- **Team Mentoring & Development:** Experience in fostering a culture of best practices, design patterns, and efficient tool usage within teams.
- **Problem-Solving & Critical Thinking:** Strong problem-solving and critical thinking skills, with a focus on providing efficient and effective solutions.
- **Adaptability:** Proven ability to adapt to new technologies and frameworks, demonstrating a commitment to continuous learning and growth.

TECHNOLOGIES

- **Programming Languages:** Go, TypeScript, JavaScript, PHP, Java, SQL (Structured Query Language), noSql
 - **Backend & Frameworks:** Laravel, Node.js (Express.js, Fastify), Apache Kafka
 - **Frontend & Mobile:** Next.js, React (Vite), Vue.js, Nuxt.js, React Native
 - **Databases & Caching:** PostgreSQL, MySQL, SQL Server, Redis
 - **DevOps & Infrastructure:** Docker, Ubuntu, Nginx, HestiaCP, Git, Cloudflare
-

PROJECTS

1. Customer Relationship Management (CRM)

- **Company:** Ahli bangun sistem
- **Role:** Full Stack Developer
- **Technologies:** Laravel, HTML, Blade, CSS, Bootstrap, JavaScript, JQuery, MySQL, AWS S3, Redis, Hestia CP, Cloudflare, React Native
- **URL:** <https://dashboard-v4.bullishfx.co>
- **Description:** Architected a secure CRM and financial wallet ecosystem with Google 2FA and real-time MT4 API synchronization, optimized via Redis, AWS S3, and Cloudflare.

2. Customer Relationship Management (CRM)

- **Company:** PasarFx
- **Role:** Full Stack Developer
- **Technologies:** Nuxt Js, HTML, CSS, Bootstrap, JavaScript, Laravel, MySQL, MySQL, AWS S3, Redis, Hestia CP, Cloudflare, React Native
- **URL:** <https://dashboard-v2.pasarfx.co.id>
- **Description:** Architected an enterprise CRM and multi-vendor e-commerce platform with automated fraud detection, integrating MT5 APIs for real-time trading and a cross-platform React Native mobile app.

3. WhatsApp Gateway

- **Company:** Ahli Bangun Sistem
- **Role:** Full Stack Developer
- **Technologies:** Node.JS, Express.JS, HTML, CSS, Bootstrap, JavaScript, MySQL, Redis, Docker, Hestia CP, Cloudflare
- **URL:** <https://xsender.beoverflow.com/>
- **Description:** Architected a high-availability WhatsApp Gateway REST API utilizing Redis for high-throughput queue management, containerized with Docker for seamless microservices scaling.

4. HRM (Human Resource Management)

- **Company:** Ahli Bangun Sistem
- **Role:** Full Stack Developer
- **Technologies:** Laravel, Blade, CSS, Bootstrap, JavaScript, JQuery, MySQL, Hestia CP, Cloudflare
- **URL:** <https://portal.pasarfx.co.id>
- **Description:** Developed a comprehensive enterprise HRM platform centralizing payroll, attendance, and recruitment pipelines, deployed securely via HestiaCP and Cloudflare for high availability.

5. POS (Point of Sale)

- **Company:** Ahli Bangun Sistem
- **Position:** Full Stack Developer
- **Technologies:** Laravel, Vue, CSS, Bootstrap, JavaScript, MySQL, Hestia CP, Cloudflare
- **URL:** <https://pos.beoverflow.com>
- **Description:** Developed a high-performance POS system with real-time inventory and payment gateway integrations, deployed securely via HestiaCP and Cloudflare for streamlined retail checkouts.

6. CallingHelper

- **Company:** Ahli Bangun Sistem
- **Position:** Full Stack Developer
- **Technologies:** Laravel, CSS, Bootstrap, JavaScript, MySQL, Hestia CP, Cloudflare, Laravel Echo, Web Socket
- **URL:** <https://www.callinghelper.com>
- **Description:** Built a scalable real-time chat platform using Laravel Echo and WebSockets, secured with granular RBAC and optimized for low-latency, high-throughput messaging.

7. Oprtech

- **Company:** Ahli Bangun Sistem
- **Position:** Full Stack Developer
- **Technologies:** Laravel, CSS, Bootstrap, JavaScript, MySQL, Hestia CP, Cloudflare,
- **URL:** <https://oprtech.com>
- **Description:** Architected an enterprise procurement system with multi-tiered approval workflows, audit-ready data tracking, and a secure Cloudflare/HestiaCP deployment infrastructure.

8. Reporting System

- **Company:** Ahli Bangun Sistem
- **Position:** Full Stack Developer
- **Technologies:** Laravel, MySQL, Stored Procedure, Bootstrap, JavaScript, MySQL, Hestia CP, Cloudflare, Laravel Echo, Web Socket
- **URL:** private
- **Description:** Architected a financial reporting system integrated with MetaTrader to process trade transactions and calculate corporate profitability, utilizing optimized MySQL Stored Procedures for high-volume financial analytics.

9. Appraisal Portal

- **Company:** Adira Finance
- **Position:** Software Engineer
- **Technologies:** Express js, Fastify, Typescript, React, Vite, CSS, Tailwind, PostgreSQL, Docker
- **URL:** private
- **Description:** Engineered secure data submission and tracking pipelines, enabling precise verification and compliant auditing of collateral records.

10. AdminPortal

- **Company:** Adira Finance
- **Position:** Software Engineer
- **Technologies:** Express js, Fastify, Typescript, React, Vite, CSS, Tailwind, PostgreSQL, Docker, Ant Design
- **URL:** private
- **Description:** Architected and developed a centralized Admin Portal serving as the single source of truth, orchestrating and integrating data across all company microservices.

11. Dana Dira

- **Company:** Adira Finance
- **Position:** Software Engineer
- **Technologies:** React Native, Express js, Fastify, Typescript, PostgreSQL
- **URL:** private
- **Description:** Engineered a cross-platform loan application platform using React Native and Fastify/Express, seamlessly integrated across internal microservices and third-party services to streamline end-to-end loan submissions.
