PROFESSIONAL SUMMARY

Software Engineer with 2 years 10 month of experience developing high-performance applications in production environments. Proven track record in leading company-wide projects, defining technical vision, and driving architectural decisions. Proficient in Python, PHP, JavaScript/TypeScript, SQL (MySQL, PostgreSQL), and NoSQL (Redis), with hands-on experience in deployment using Hestia.

KEY ACHIEVEMENTS

- **Project Leadership:** Successfully led multiple end-to-end application projects, from requirements gathering to release, delivering high-quality and reliable solutions.
- **Team Mentorship:** Guided and mentored junior developers by promoting best practices and effective tool usage, contributing to team efficiency and professional growth.

WORK EXPERIENCES

AHLI BANGUN SISTEM - Indonesia's Tech Company

Software Engineer | January 2022-Present

- Designed and developed a Wallet System for marketers, enabling automatic balance earnings, secure withdrawals, transfers, and enhanced protection with Google 2FA.
- Built a Shop System for users and vendors to buy/sell products, with an admin dashboard to monitor transactions and detect potential fraud.
- Developed a WhatsApp Gateway REST API, simplifying integration of WhatsApp functionalities into existing systems.
- Created a Dynamic CRM System with role-based access control, analytics dashboard, modular components, and REST API support for scalability.
- Built a comprehensive HRM System for recruitment, payroll, attendance tracking, project management, and performance evaluations.
- Optimized SQL queries, improving response times from 1 minute to 1 millisecond, significantly enhancing user experience.
- Integrated OpenAI API to deliver real-time business summaries, allowing users to query profit, client count, and other insights with instant AI responses.
- Implemented Facial Recognition for secure user verification during login and profile updates.
- Set up and managed Ubuntu server deployment with Hestia Control Panel, including Nginx, SSL, database management, and Cloudflare integration.
- Designed and implemented a Referral Tree System to track user referrals, automate rewards, and provide data-driven insights for marketing strategies.

EDUCATIONS

PELITA BANGSA UNIVERSITY

Bachelor of Computer Science | Aug 2021 - Aug 2025

- Specialized in web development, covering both frontend and backend processes.
- **Relevant coursework:** Operating Systems Architecture, Linux/Unix Programming, Web & Software Usability, Java Programming (Beginner & Intermediate), Web Development, Relational Database Design & SQL, Data Engineering, Advanced Software Programming.

SKILLS

- **Full-Stack Software Development:** Proficient in end-to-end software development lifecycle, with expertise in PHP, Laravel, Node JS, Express Js, Typescript, HTML/CSS, JavaScript, React, Next, Vue, Nuxt, React Native and SQL/NoSQL databases.
 - **Project Leadership & Management:** Demonstrated ability to lead projects, improve timelines, and foster team development.
 - **System Design & Analysis:** Proficient in system design and analysis, contributing to the development of efficient and effective software solutions.
 - **Data Processing & Analysis:** Proven ability to design and implement systems for efficient data processing.
 - **Microservices Development:** Solid understanding of microservices development for building scalable and efficient applications.
 - **Software Development Principles:** Familiar with key software development principles like SOLID and DRY, contributing to scalable and maintainable software.
 - **Cybersecurity:** Solid knowledge of cybersecurity principles to ensure the secure development of software applications.
 - **Version Control:** Experienced in using Git for code version control.
 - **Database Knowledge:** Practical knowledge of SQL and database concepts, with experience in designing and managing databases.
 - **Agile Methodologies:** Proficient in Agile frameworks such as Scrum for project management.
 - **Status Tracking:** Experienced in using status tracking frameworks like Clickup for efficient project management and progress tracking.
 - **Team Mentoring & Development:** Experience in fostering a culture of best practices, design patterns, and efficient tool usage within teams.
 - **Problem-Solving & Critical Thinking:** Strong problem-solving and critical thinking skills, with a focus on providing efficient and effective solutions.
 - **Communication & Collaboration:** Excellent interpersonal communication skills, with the ability to liaise effectively with both technical and non-technical stakeholders.
 - **Adaptability:** Proven ability to adapt to new technologies and frameworks, demonstrating a commitment to continuous learning and growth.
-

TECHNOLOGIES

- **Programming Languages:** Proficient in PHP, JavaScript, and, Typescript
 - **Web Frameworks:** Experienced in using Laravel, CodeIgniter, ReactJS, NextJS,Vue, jQuery, React Native,NodeJS,Express.js,Typescript, Bootstrap, Tailwind.
 - **Database Management:** Skilled in SQL (MySQL, PostgreSQL) and NoSQL (Redis) databases.
 - **Cloud Platforms:** Proficient in using AWS (S3).
 - **Version Control & Project Management Tools:** Experienced in using Git for version control and Clickup for project management.
 - **Server Technologies:** Skilled in using Nginx and Docker for server management, with experience in both Windows Server and Linux/Ubuntu environments. Also experienced in Cloudflare configuration and Hestia Control Panel for secure and efficient deployment.
-

PROJECTS

1. Customer Relationship Management (CRM)

- **Company:** Ahli bangun sistem
- **Role:** Full Stack Developer
- **Technologies:**Laravel, HTML,Blade, CSS, Bootstrap, JavaScript, Jquery, MySQL, AWS S3, Redis, Hestia CP, Cloudflare
- **URL:** private
- **Description:** Developed a comprehensive CRM system to manage customer data and support ticketing. Responsible for both backend and frontend development, integrating dynamic interfaces with Laravel-based APIs. Implemented secure authentication, role-based access control, and automated email notifications. Optimized file storage with AWS S3, boosted performance with Redis caching, and ensured high availability through Hestia CP and Cloudflare. This project significantly improved customer engagement, streamlined internal workflows, and strengthened data security.

2. Customer Relationship Management (CRM)

- **Company:** PasarFx
- **Role:** Full Stack Developer
- **Technologies:**Nuxt Js, HTML, CSS,Bootstrap, JavaScript, Laravel, MySQL, MySQL,AWS S3, Redis,Hestia CP, Cloudflare
- **URL:** private
- **Description:** Developed a comprehensive CRM system to manage customer data and support ticketing. Responsible for both backend and frontend development, integrating dynamic interfaces with Laravel-based APIs. Implemented secure authentication, role-based access control, and automated email notifications. Optimized file storage with AWS S3, boosted performance with Redis caching, and ensured high availability through Hestia CP and Cloudflare. This project significantly improved customer engagement, streamlined internal workflows, and strengthened data security.

3. WhatsApp Gateway

- **Company:** Ahli Bangun Sistem
- **Role:** Full Stack Developer
- **Technologies:** Laravel, Node.JS, Express.JS, HTML, CSS, Bootstrap, JavaScript, MySQL, Redis, Docker, Hestia CP, Cloudflare
- **URL:** <https://xsender.beoverflow.com/>
- **Description:** Developed and designed WhatsApp Gateway APIs for integrating WhatsApp with other systems.

4. HRM (Human Resource Management)

- **Company:** Ahli Bangun Sistem
- **Role:** Full Stack Developer
- **Technologies:** Laravel, Blade, CSS, Bootstrap, JavaScript, JQuery, MySQL, Hestia CP, Cloudflare
- **URL:** (private)
- **Description:** Designed and developed a comprehensive Human Resource Management (HRM) system covering payroll, recruitment, attendance tracking, and performance evaluation. Integrated third-party APIs to automate workflows and enhance operational efficiency, resulting in streamlined HR processes and improved workforce management.

5. POS (Point of Sale)

- **Company:** Ahli Bangun Sistem
- **Position:** Full Stack Developer
- **Technologies:** Laravel, Vue, CSS, Bootstrap, JavaScript, MySQL, Hestia CP, Cloudflare
- **URL:** (private)
- **Description:** Designed and developed a Point of Sale (POS) system to streamline sales transactions, inventory management, and customer data tracking. Key features included real-time sales processing, barcode scanning, stock management, receipt generation, and sales reporting. Integrated with payment gateways and third-party APIs to improve operational efficiency and deliver a seamless checkout experience.
